

## [Garlic Keeps Fanged Fish Parasites Away](#)

Recently, an article about the effect of garlic on fanged parasites, was published in Aquafeed.

Among other things, the article concludes that garlic diets has a positive effect on parasites, as a research found that barramundi's fed with a garlic rich diet were free of infection, in opposite to the barramundi's fed a non-garlic diet, where 100% of the fish became infected.
