Du-Sweet™ Liquid

Description

Du-Sweet Liquid is a feed premix (mixture of flavouring compounds) for inclusion in drinking water for piglets, calves, dairy cows and other animals to increase the water intake. A high water intake is crucial for the welfare of the animals. By including **Du-Sweet Liquid** in drinking water for animals in the first 3-7 days after weaning, the palatability of the water will be improved. It gives the water a sweet taste that is attractive for piglets and calves, as it reminds them of the mother's milk.

Du-Sweet Liquid contains NHDC (Neohesperidin dihydrochalcone – a sweetener that is 50-60 times sweeter than sugar), stevioside (*Stevia rebaudiana*) and spray-dried extracts of liquorice (*Glycyrrhiza glabra*).

Specifications

Contents	Elements of NHDC (Neohesperidin dihydrochalcone, E959), stevioside (<i>Stevia rebaudiana</i>), spray-dried liquorice (<i>Glycyrrhiza glabra</i>) and preservatives
Appearance	Yellow liquid
Stability	Minimum 12 months, when kept in unopened or tightly closed packaging
Storage	Dry, cool (below 30°C)
Packaging	1 litre plastic bottles 5 litre plastic bottles

Recommended dosage

Piglets	500-1000 ml / 1000 litres of drinking water
Calves	500-1000 ml / 1000 litres of drinking water
Dairy Cows	500-1000 ml / 1000 litres of drinking water

Note: The feed additives in this product are registered in accordance with Regulation (EC) No 1831/2003 concerning feed additives and are listed in the Community Register of Feed Additives.
